1926 August 17<sup>th</sup>

New. Stamped out steel  
melting pot in little furnace  
first time. put in furnace with  
all new Cyanide & no other  
preparation. Pot melted in 3/4 hour.

8778 Trial piece of mild steel  
dipped in water. Clean but fibre  
& flaws showed up on the surface.

8779 3159 R<sup>r</sup>. 4 as & 8 as  
Court de Stamp Nabha state  
The pot became very hot &  
the roller when dipped had a  
black streak round the middle.  
Hydrochloric acid cleaned this  
off. Power quite hard but  
slightly rough on surface.

Aug 19<sup>th</sup>.

8780 Same melting pot lighted up  
with three burners. piece of mild  
steel 1/2 hour dipped in water  
Came out rather rough but not so  
much as 8778.

1926

Aug 19<sup>th</sup> (cont)

8781. Platen rollers roller put in after adding more Cyanide for 35 minutes dipped in water came out cleaner & smoother on surface than 8779

8782. Hot die, furnace turned down to one burner & kept a light till after dinner hour, pot cooled too much, second burner lighted then flat die containing 6 small white line patterns put in for 3/4 hour, fairly clean but bright but hard. (oil)

8783 Hot die 1 Rupee Court Fee Stamp Nabha State (still two burners only) 50 minutes dipped in oil quite hard came out rather thick but hard on surface, cleaned up satisfactorily with emery.

Portrait of Head.

Note. Small furnace. Result: a net-  
work of lines all over the surface giving  
a 'frosted' appearance.

8 Nov. 1926

Furnace (small) lighted and all chemical removed. It was thought that extreme heat of no 8778 & 8779 hardening had altered the chemical properties of the cyanide.

9. Nov

8812. Small furnace lighted with new cyanide. Three test pieces of die steel hardened. One with vasoline on, one with turps, one quite clean. Result - same. Very slight indication of mottled appearance.
